Preface

This edition of the annual Statistics Canada Catalogue describes all current publications available for purchase from the agency as of January 1, 1982; current publications are those containing data less than 10 years old. A Supplement updating the Catalogue will be released in mid-1982.

Technical papers, memoranda and working papers, which are of interest to a limited audience, are disseminated as non-catalogued materials. Such publications are compiled in *Listing of Supplementary Documents* (11-207).

One set of the Catalogue and Supplement (one English copy and one French copy) is provided to an organization at no cost. For each additional single copy or set there is a charge of \$5.00. The Catalogue can be ordered from User Services, Ottawa, Ontario K1A 0T6, or from any Statistics Canada regional reference centre. Recipients of the 1982 Catalogue will automatically be sent the Supplement and an order form for the next edition.

TITLE, SUBJECT AND COMMODITY INDEX 73

Introduction

HOW TO USE THE CATALOGUE

The Catalogue is in two parts. The first is an annotated listing of publications arranged by catalogue number and grouped by subject. The entries specify the title, frequency of issue, the number of pages, the language or languages of publication, the International Standard Serial Number, the date of first release, the price and a brief description of the contents. Information on discontinued publications, new releases and changes of title and price since the last Catalogue are also included.

The second part is a detailed Subject, Title and Commodity index alphabetically arranged and cross-referenced to facilitate user access. Catalogue numbers follow each index entry and direct readers to the publications listed in part I.

HOW TO ORDER PUBLICATIONS

To purchase publications from Statistics Canada, use the order form at the back of the Catalogue. List the publication title, catalogue number and issue; also indicate the type of order required i.e., subscription or individual copy. (Subscriptions begin with the issue released following the receipt of order.) Mail the completed form to Publication Sales and Services at the address on the order sheet. Individual publications may also be ordered from the regional reference centres listed below, or from authorized bookstore agents.

Payment must accompany all publication orders. Cheques and money orders should be made payable to the Receiver General for Canada. Payments by Visa and Master Card credit cards are also accepted, provided the number and expiry date of the cards are noted on the order form. To cover additional postage and handling charges, customers from outside Canada must add 20% to quoted prices. An extra charge is also levied if first class, air mail or courier service is requested.

Postage stamps and currency should not be used in ordering publications by mail. Remittances from foreign countries should be by international money order.

For the convenience of customers who frequently order publications, Statistics Canada offers a monthly invoicing service. Applications for this service are available from Publication Sales and Services, or from Statistics Canada regional reference centres.

Under the "Full Publications Service" customers can automatically obtain copies of catalogue publications. The cost per annum is \$4,000 for inside Canada orders and \$4,800 for outside Canada orders. Not included in the service are publications from the decennial or

quinquennial Census of Population, the Census of Agriculture or from the Census of Merchandising and Services. Inquiries should be directed to Publication Sales and Services.

Organizations such as schools, school boards, colleges, universities and public libraries are allowed a 30% discount on all publication orders.

HOW PUBLICATION PRICES ARE DETERMINED

Prices for most publications are set following a designated page count formula. If printing and distribution costs rise, it will be necessary to raise prices unless there is an offsetting increase in sales. Statistics Canada will be promoting its publications more actively to increase sales. It should be noted that prices of publications are not set in an attempt to recover the costs of collecting and analyzing data.

OTHER DATA FORMATS AND HOW TO ORDER THEM

Canadian Socio-Economic Information Management System (CANSIM®)

CANSIM is Statistics Canada's computerized data bank and information retrieval service. Nearly all of the data appearing in publications, as well as many more data, are available from CANSIM via terminal, on computer printout, or in machine readable form. CANSIM, on one hand allows the retrieval of the latest statistics such as Labour Force Index and Consumer Price Index on the same day they are released to the public, and on the other hand contains extensive historical data relevant to time series analysis. The information in CANSIM is of two types — time series statistics which show changes over time and cross-classified statistics which show the relationships between different data at a given point in time. The CANSIM data are available through a number of data processing service companies.

Details on CANSIM may be obtained from the CANSIM Division, Statistics Canada, R.H. Coats Building, Holland

Data in Microform

In addition to publications and on-line computer tabulations, Statistics Canada makes data available in microform. A large part of the output of the 1976 Census of Population is on microfiche, as are most 1976 Census of Agriculture tabulations and all current serial publications of the External Trade Division. Further information on microform offerings is available from Statistics Canada regional reference centres.

A complete collection of Statistics Canada publications is offered on microfiche by Micromedia Limited of Toronto. The collection includes many rare and out of print items. For details, please contact the firm at 144 Front Street West, 5th Floor, Toronto, Ontario M5J 2L7, (416) 593-5211.

Data on Magnetic Tape

Data on magnetic tape can be obtained from various sources in the bureau. Some of these tapes are listed below.

Census of Population and Housing

Data files from the decennial and quinquennial censuses of population and housing include the following products:

User Summary Tapes contain tabulated data on enumeration areas, census tracts, census subdivisions and municipalities.

Public Use Sample Tapes offer a 1% sample of non-confidential records of individual respondents, families and households.

Spatial Reference Tapes describe the geographic hierarchies of census data including place names, geographic codes and coordinates, street addresses and block faces of major urban areas, and boundaries for computer mapping.

Census of Agriculture

User Summary Tapes, essentially as described above, are also available for the Census of Agriculture.

Labour Force Survey

Computer tapes can be obtained from the Labour Force Survey for each month starting from January 1966. These tapes contain records which can provide labour force characteristics for selected variables.

Survey of Consumer Finance

Magnetic tapes containing microdata on incomes of census families and economic families are available for 1971, 1973, 1975, 1977 and 1979. There are also tapes containing microdata on household income, facilities and equipment.

Survey of Family Expenditure

A computer tape from the 1978 Survey of Family Expenditures features microdata on the expenditures, incomes and characteristics of families.

External Trade

Computer tapes containing import and export statistical data are also available from the External Trade Division. The standard tape contains monthly commodity by country information, but tailored tape files may be obtained on demand.

For complete information on the availability of magnetic tapes, please contact the regional offices of Statistics Canada or subject-matter areas.

HOW TO GET HELP IN FINDING AND USING DATA

Guides and Indexes

The 1982 Statistics Canada Catalogue excludes publications containing data which is 10 or more years old; it also does not cover titles discontinued before 1981 and out-of-print items. For information on these materials, please consult the *Historical Catalogue of Statistics Canada Publications*, 1918-80. The Historical Catalogue will be released in the spring of 1982 and is available by completing the order form at the back of the Catalogue. Please quote catalogue no. 11-512E on your order.

Also to be released in the spring is *Bibliography of Federal Data Sources, excluding Statistics Canada*, 1981. It will include brief descriptions of recurring federal publications containing social or economic statistics, plus an index of keywords. Descriptions include listings of statistical table titles, bibliographic information, and a brief abstract. Please quote catalogue no. 11-513E on your order.

A number of publications listed in the 1982 Catalogue may also assist users in locating needed statistics and in keeping up-to-date with new releases. They include the *Statistics Canada Daily* (11-001E), *Infomat* (11-002E), *New Surveys* (11-006), *Listing of Supplementary Documents* (11-207), *CANSIM Summary Reference Index* (12-202E), *The Standard Industrial Classification* (12-501), *The Standard Occupational Classification*, 1980 (12-565E), *The Standard Geographical Classification* (12-556), *The Canadian International Trade Classification* (65-502) and *Guide to Federal Government Labour Statistics* (72-512).

Manufacturing

Description of Reports

Publications listed under Manufacturing relate to Division 5 of the Standard Industrial Classification.

Some of these reports provide summarized and analytical information for manufacturing as a whole; others provide detailed information on individual manufacturing industries or on various commodities.

Although titles of the various reports are broadly indicative of the subject matter covered, explanatory notes have been included under title headings where necessary. Such notes are generally restricted to reports on the manufacturing industries as a whole (sub-group 31) and to those publications on commodities. The reports on individual industries are generally similar to each other in character and include such principal statistics as: number of establishments, number and type of employees and their salaries and wages, cost of fuel and electricity, value of shipments of goods of own manufacture, and value added. Comparative statistics are given for Canada for earlier years and for the preceding year for provinces. Also shown are the value and, where applicable, quantities of major products shipped and purchased materials used by establishments classified to the industry. Some reports show total manufacturers' shipments of relevant commodities without regard to industry of origin, but this is given comprehensively for all commodities in an annual report on products shipped by Canadian manufacturers.

Primarily because annual surveys cannot be initiated until the end of the calendar year and because of the time required to collect edit and compile extensive data, most annual industry reports are not available until a year or more after the end of the year of survey.

In addition, there are a large number of publications that are published more frequently than once a year and that contain current information on commodities (generally shipments, production or consumption). Although not exactly suitable to industry analyses, except in the case of one-industry commodities, they have proven to be most useful in commodity analyses.

Current estimates of the value of shipments, inventories and orders for manufacturing industries in total, numerous sub-aggregations and selected industries are issued monthly. They are based on a sample survey of establishments representing about 75% of the shipments, determined from the Census of Manufactures.

1976 Census of Canada

Popular Series

The five 1976 Census popular studies are produced in a journalistic style with coloured art work, simple graphs and summary tables. These studies are primarily intended for use at the high school and community college/university levels. They may, however, be of interest to the general public and other groups.

98-800E Canada's Elderly. E. and F. 32 pp. \$1.25

Highlights some of the following facts about our aging population: declining fertility trends mainly account for the growing proportion of elderly; most of the elderly live in family settings but many elderly women live alone; almost half of all persons living in collective dwellings are elderly; Prince Edward Island has the highest proportion of elderly to its population; it is estimated that by 2001 the proportion of elderly may reach between 11 and 12%.

98-801E Canada's Families. E. and F. 27 pp. \$1.25

Discusses many of the changes taking place in the traditional structure of the family: today's families are much smaller than ever before; families are more ready to disband if things are not working out between husband and wife, marriages, however, are on the increase; the number of female lone-parent families rose rapidly between 1971 and 1976, while their male counterparts actually declined; more and more wives are working outside the home and many of them have young children; low income families spend a greater proportion of their budgets on food and shelter than high income families; by 2001 there could be between 8.4 and 9.1 million families in Canada.

98-802E Canada's Population: Demographic Perspectives. E. and F. 32 pp. \$1.25

Totalled 5.4 million in 1901 and by 1976 had increased to 23 million. The present century witnessed three major trends in population growth since the peak growth rate of 3.4% between 1901 and 1911: the number of females exceeded the number of males for the first time in 1976; the proportion of young children in the population is declining while the proportion of elderly is increasing; Canada's working age population increased from 9.2 million in 1961 to 12.7 million in 1976; single men outnumber single women, but widowed women far exceed widowed men; British Columbia and Alberta had the greatest population percentage increase during 1971-76; by 2001 Canada's population is likely to reach between 28.1 and 31 million; migration is expected to play an important role in future population growth in Canada.

98-803E Canada's Cities. E. and F. 32 pp. \$1.25

Brings together some of the facts about our highly urban population: between 1901 and 1971 the share of the urban population increased from 37.5% to 76.1%; Calgary was Canada's fastest growing census metropolitan area, while the population of the Windsor census metropolitan area actually declined between 1971 and 1976; also during those years, nine central cities recorded declines in their populations; most of the growth has occurred in the suburbs; Thunder Bay has the largest proportion of private households occupying single-detached dwellings among the census metropolitan areas and Montreal the largest proportion occupying apartments; French is the dominant mother tongue for Chicoutimi-Jonquiere and English the most dominant for St. John's. Along with the slowdown in urban growth in recent years (1971-76) there is a hint of a renewed interest in rural living.

98-804E Canada's Female Labour Force. E. and F. 34 pp. \$1.25

Many facts about the female labour force are revealed: close to four million women were in the labour force in 1976; in recent years they have been entering the labour market at a faster rate than men; nearly two-thirds of the female labour force are married, the majority are in the younger age groups and they tend to have fewer children than those not in the labour force; women have higher unemployment rates than men and they work in a narrower range of industries; although men have higher average annual incomes than women, some of this difference is accounted for by full- or part-time work and length of work experience.

98-810 Children in Canadian Families. by Sylvia T. Wargon. Bilingual. 109 pp. \$4.25

The proclamation of 1979 as the *Year of the Child* by the United Nations seemed a fitting occasion for a presentation on Canadian children by Statistics Canada's Social Statistics Field. This publication is intended for those who are interested in statistical series, data sources, and a general picture of the main features of recent demographic trends and aspects of children in Canadian families as revealed in the Canadian census data. The emphasis is on the display of data series not available elsewhere, and on their description and interpretation in broad outline form.
